

Australian Rare Cancer (ARC) Portal

Information for clinicians

AUSTRALIAN
RARE
CANCER
PORTAL

The ARC Portal is a free, national, clinician-led service, connecting you to trusted rare cancer expertise — so you can make decisions and recommendations with confidence.

The ARC Portal provides practical, evidence-informed support to strengthen decision-making for rare cancers.

Expert input, on demand

Connect with a national and international network of rare cancer specialists.

Genomic insight

Support with appropriate testing and interpretation of molecular results.

Clear, actionable recommendations

Patient-specific guidance grounded in current evidence and literature.

Access to trials and treatment pathways

Identify relevant clinical trials, therapeutic options, and drug access pathways.

Why use the ARC Portal?

- Supports decision-making when cases are complex or uncertain
- Provides equitable access to rare cancer expertise — wherever you practise
- Works alongside your existing MDT processes
- Helps identify additional treatment and research options
- Contributes to a growing national evidence base for rare cancers

Which patients can be referred?

Any Australian patient with:

- A rare cancer (incidence < 6 per 100,000), or
- A rare molecular subtype of a more common cancer

Supporting your judgement.

Keeping the care of your patient with you.

About ARC Portal

The Australian Rare Cancer Portal receives funding from the Australian Government and is managed by BioGrid Australia. The WEHI Stafford Fox Rare Cancer Program is approved by the Melbourne Health Human Research Ethics Committee (HREC/15/MH/396).
